

# LANCASTER PUMP'S

# SURVIVOR<sup>®</sup>

Stainless Steel **Discharge Head** with **field replaceable Internal Check Valve**. Molded jug handle - no need for safety cable adapter.

Fluted Polyurethane **Bearing** at top end of shaft. Field replaceable.

Stainless Steel **Cable Guard** for maximum cable protection. Attached with stainless steel screws.

Balanced Teflon<sup>®</sup> impregnated **Impellers** made of glass-filled thermoplastic, provide for lower friction for longer pump life.

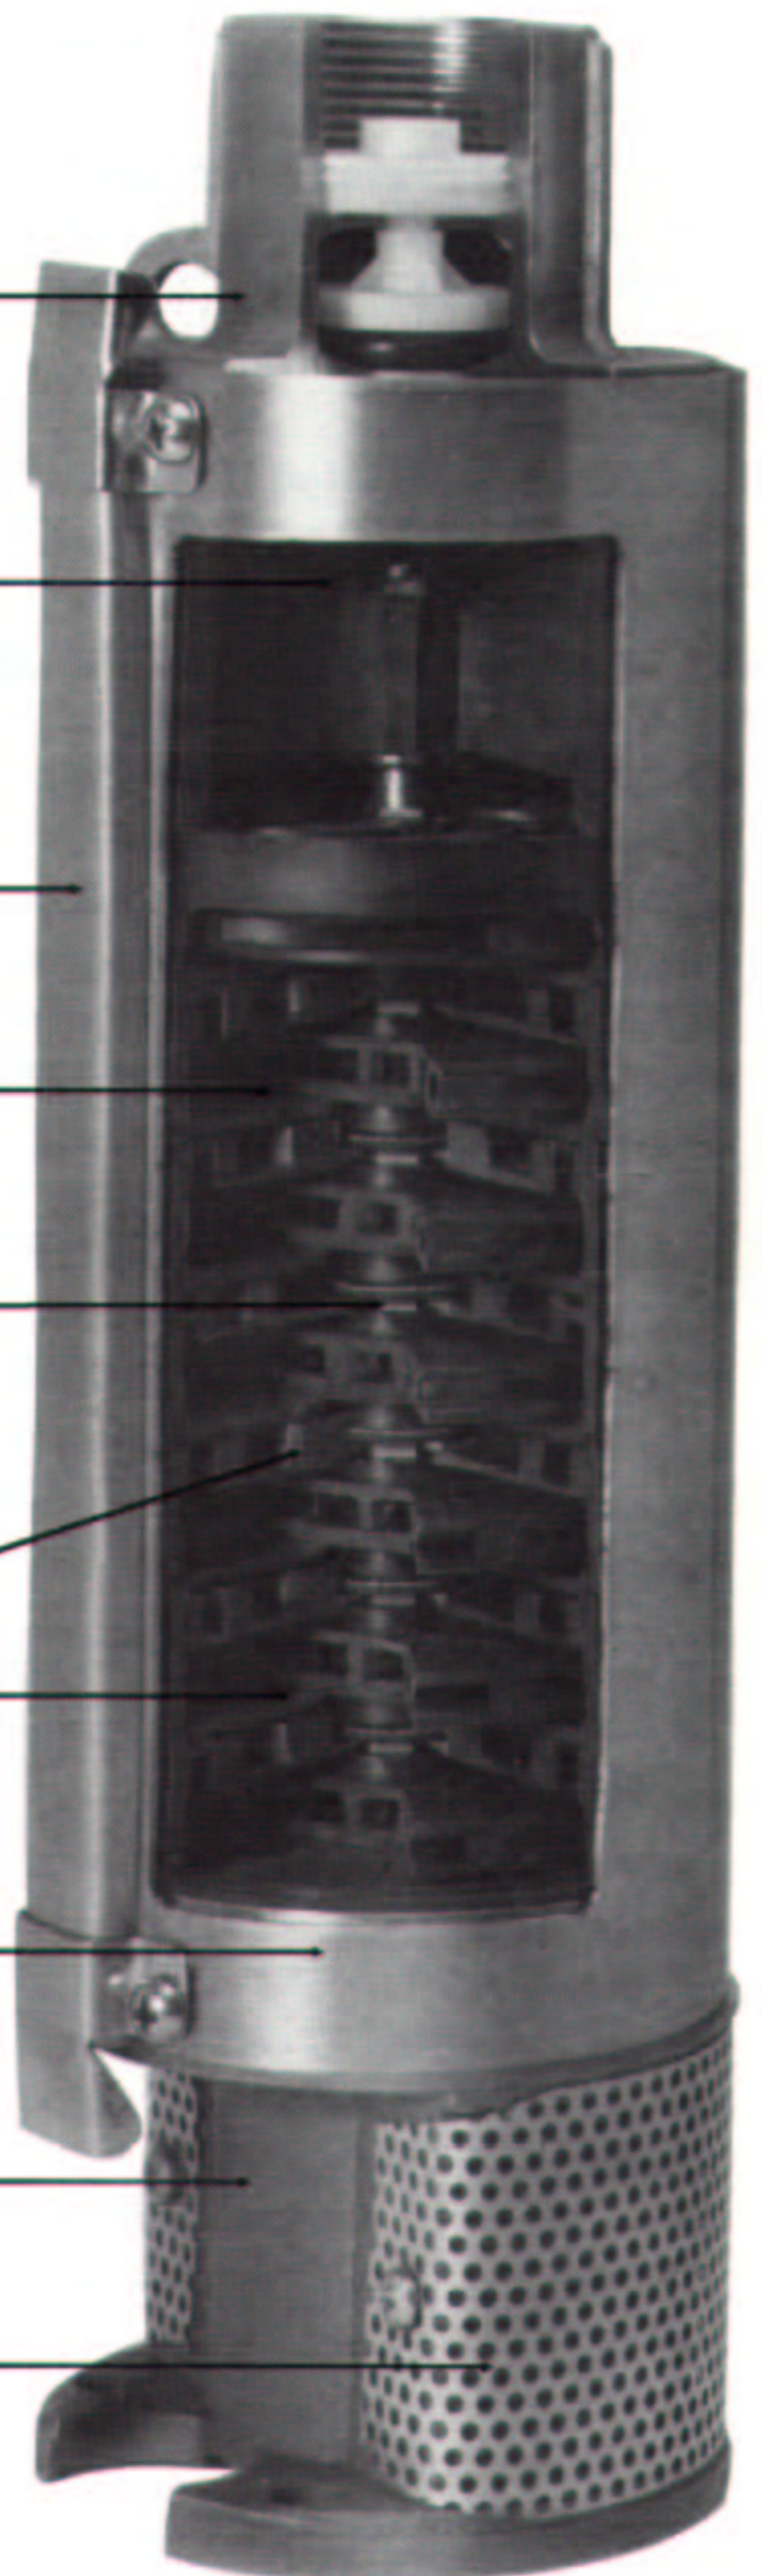

Stainless Steel **Hex Shaft** with slotted end for test turning.

Fully enclosed, glass-filled thermoplastic **Diffusers** and **Stage Plates** with stainless steel wear surfaces. Each stage is complete with an individual composite thrust washer for extra protection.

Heavy wall, high quality Stainless Steel **Pump Casing** sized inside for perfect stage alignment.

Stainless Steel **Motor Support**. (Available in Glass-filled Noryl<sup>®</sup> on "SP" series, 1/2 HP thru 1-1/2 HP models.

Stainless Steel **Screen**, cannot snap off during installation.

**Lancaster Pump** is proud to present the newest addition to our submersible line, the "**SURVIVOR**<sup>®</sup>". Pictured above is our "S" series which utilizes stainless steel construction. Rugged stainless steel and superior thermoplastic staging provide high strength and abrasion/corrosion resistance under difficult operating conditions. As in the past, **Lancaster Pump**, teamed up with **Franklin Electric's** super stainless water filled motors, mean affordable prices with dependable protection. You can't ask for anything more - just ask for "**Lancaster**"!
